- (c) **Components of Remote Sensing:**
- (i) Target, (ii) Energy source, (iii) Transmission path iv) Sensor.
  - The object or material that is being imaged is called Target. Remote sensing collects information about the target without coming into physical contact with Target.
  - The energy source provides the required electromagnetic energy to the target. This energy source may be a natural source of energy such as the Sun or an artificial source such as Radar. The remote sensing methodology makes use of wide range electromagnetic spectrum.
  - The electromagnetic radiation interacts with the target. The transmit information will be passed on to the sensor.
  - Sensor is a device that detects the electromagnetic radiation. Sensors transmit their own signal and measure the energy that is reflected from the target.
- Part – IV**
51. (a) **Functions of Modern welfare state:**
- Protective functions:** Economic development can be achieved only if there is peace in the state.
  - So the primary function of the government is to maintain law and order besides protecting the people from external aggression and internal disorder.
  - The Administrative function:** Three important wings of the state are Legislature, Executive and Judiciary.
  - Social Security functions:** The government undertakes social security measures by offering relief to the poor, sick and the unemployed.
  - Economic functions:** The government takes various measures to improve agriculture and develop trade and industry.
  - Eg: Grant subsidies loans at lower rate of interest, administered and support prices etc.,
- (or)
- (b) **Green Revolution:**
- The process of increasing production of food grains using High Yielding Variety (HYV) seeds is called Green Revolution. The Green Revolution particularly in the production of wheat and rice took place in 1967.
  - It requires regular supply of water, fertilizer, pesticides and financial resources.
  - Indian council of Agricultural Research took the initiative in promoting HYV seeds to increase agricultural production.
  - Government subsidy of fertilizer and pesticides helped the farmers to grow more crops.
  - Green Revolution benefited large number of states in India. This enabled India to achieve self sufficiency in food-grain production.
- (or)
- (c) **Various power programs in TN:**
- Thermal Power:** Thermal power stations are in Ennore, Tuticorin, Mettur, Basin Bridge and Neyveli.
  - Hydel Power:** Hydel power stations are in Mettur, Kundah, Periyar Dam, Kothayar Dam, Pykara, Singara and Moyar.
  - Atomic Energy:** Atomic power stations are in Kalpakkam and Koodankulam.
  - Wind Energy:** It is a non-conventional form of energy. The windmills are situated in Coimbatore, Kanyakumari, Tuticorin, Ramanathapuram and Tirunelveli.
